

**AMENDMENTS TO THE CLAIMS**

1. (Original) A method of backing-up files, comprising:  
storing a plurality of files on a local device;  
identifying an ownership property associated with each of the files;  
transmitting a list of the files along with the associated ownership property to a  
backup/restoration service; and  
requesting restoration of at least one of said plurality of files.
2. (Currently Amended) The method according to claim 1 further comprising:  
assembling ones of said plurality of files into a collection, wherein said transmitting  
comprises transmitting indicia of said ones of said plurality of files included in said  
collection.
3. (Currently Amended) The method according to claim 1 further comprising:  
transferring content information corresponding to at least one of said plurality of said  
files to a digital storage medium; and  
shipping said digital storage medium to a requestor of a restoration service.
4. (Original) The method according to claim 1 further comprising:  
reading file information from a plurality of removable media;  
converting a format of said file information; and  
storing the converted files on the local device.
5. (Currently Amended) The method according to claim 1 further comprising:  
storing, for each of the files of said list, content and property right information.
6. (Currently Amended) The method according to claim 1 further comprising:  
storing, for each file of said list, content information including digitized audio data  
and property right information including indicia of an ownership right of said content  
information sufficient to allow making a restoration copy thereof.
7. (Currently Amended) The method according to claim 1 further comprising:  
storing, for each of the files of said list, content and performance information.

8. (Original) The method according to claim 1 further comprising:  
storing audio files in a psychoacoustic compressed format.
9. (Currently Amended) The method according to claim 1 further comprising:  
storing a single copy of an audio file on a storage medium at said backup/restoration service for a plurality of subscribers designating said audio file in said list.
10. (Currently Amended) The method according to claim 1 further comprising:  
associating indicia of copying rights with said files of said list; and  
selectively storing backup copies of said files of said list on a remote storage medium in response to said indicia.
11. (Currently Amended) A system comprising:  
a storage medium configured to store a plurality of files;  
a communications link for transmitting a list of the files to a remote location; and  
a file server sever located at the remote location, said file server connected to the communications link and operable to receive and store the list of files and responsive to a restoration request for selectively restoring at least one of the files associated with an appropriate status of an ownership property associated with the files.
12. (Currently Amended) The system according to claim 11 wherein said storage medium further comprises a digital mass storage device configured to store said files in a compressed audio encoding format ~~and a format associated with at least one of said files' respective property information indicative of a right to restore an associated one of said files.~~
13. (Currently Amended) The system according to claim 11 wherein said file server further comprises a digital mass storage device configured to restore at least one of said files of said list onto a restoration medium useable eompatible with said storage medium.
14. (Original) The system according to claim 11 wherein said file server is further configured to store a plurality of said lists and a common copy of each distinctive file referenced by any one of said plurality of lists.

15 (Original) The system according to claim 11 wherein said storage medium comprises a digital audio system configured to store a plurality of audio files in a compressed format including a removable media player configured to read audio media and a communications link configured to download audio files from a network.

16. (Original) A computer program product comprising:  
a computer usable medium having computer readable program code embedded therein,  
the computer readable program code comprising:

computer readable program code means for causing a computer to store a plurality of files on a local device;

computer readable program code means for causing a computer to transmit a list of the files to a backup/restoration service;

computer readable program code means for causing a computer to identify an ownership property associated with each of the files; and

computer readable program code means for causing a computer to selectively restore files associated with an appropriate status of the ownership property.

17. (Currently Amended) The computer program product according to claim 16 further comprising:

computer readable program code means for assembling said plurality of files into a collection, wherein said computer readable program code means for causing a computer to transmit comprises transmitting indicia of said plurality of files included in said collection.

18. (Original) The computer program product according to claim 16 further comprising:

computer readable program code means for reading file information from a plurality of removable media;

computer readable program code means for converting a format of said file information; and

computer readable program code means for storing the converted files on said local device.

19. (Original) The computer program product according to claim 16 wherein said computer readable program code means for causing a computer to store a plurality of files further comprises:

storing, for each of the files, content and performance information.

20. (Original) The computer program product according to claim 16 further comprising:

computer readable program code means for identifying a source medium as a stamped compact disc (CD);

computer readable program code means for recognizing watermarks present in said files; and

computer readable program code means for identifying metadata associated with said files.

21. (Original) The computer program product according to claim 16 wherein said computer readable program code means for causing a computer to store a plurality of files further comprises:

storing, for each of the files, content and property right information.

22. (Currently Amended) The computer program product according to claim 21 further comprising:

storing, for each file, content information including digitized audio data and property right information including indicia of an ownership right of said content information sufficient to allow making a restoration copy thereof.

23. (Original) A system comprising:

means for storing a plurality of files;

means for receiving a list of files stored at a remote location, the list of files include an ownership property associated with each of the listed files;

means for storing the list of files;

means for receiving a restoration request from the remote location; and

means for restoring the files to the remote location.

24. (Currently Amended) The system according to claim 23 further comprising:  
means for transferring content information corresponding to said files of said list to a  
digital storage medium; and  
means for shipping said digital storage medium to a requestor of a restoration service.

25. (Currently Amended) The system according to claim 23 further comprising:  
downloading one of said files of said list from a remote server.

26. (Original) The system according to claim 23 further comprising:  
means for reading file information from a plurality of removable media; and  
means for converting a format of said file information wherein said means for storing  
a plurality of files further comprises storing the converted files on a local device.

27. (Currently Amended) The system according to claim 23 wherein said storing  
means further comprises storing, for each of the files of said list, content and property right  
information.

28. (Currently Amended) The system according to claim 23 wherein said storing  
means further comprises storing, for each file of said list, content information including  
digitized audio data and property right information including indicia of an ownership right of  
said content information sufficient to allow making a restoration copy thereof.
